

VITAL ENERGI UTILITIES LIMITED ENERGY POLICY SIGNED STATEMENT

"Vital Energi's vision is to innovate simple and reliable energy solutions that actively contribute to the sustainability agenda and provide security of supply"

As one of the first companies to provide green energy systems in The United Kingdom, we are proud to highlight our illustrious history in developing quality solutions that have contributed towards environmental prosperity and customer satisfaction over decades.

MANAGING ENERGY CONSUMPTION: As per Vital Energi's Environment & Sustainability Policy Statement, we aim to reduce the ecological and environmental impacts of our activities by understanding and controlling those impacts.

Vital Energi therefore recognises that energy consumption constitutes a significant environmental aspect which can have potentially severe impacts on air, water, land, ecology, biodiversity and nuisance manifestations.

We therefore commit to implement a robust and effective energy management strategy in order to mitigate as far as possible, impacts associated with energy consumption contained within our scope. Examples of commitments include...

- Minimising energy consumption in office and site spaces by promoting environmental awareness, installing energy efficient equipment and ensuring economical use of electronic equipment.
- Ensuring a sustainable procurement process by choosing local suppliers and selecting desirable equipment that carries a low environmental impact.
- Integrating electric/plug in/hybrid vehicles to diversify our company fleet and reduce carbon footprint.

ENSURING CONTINUAL IMPROVEMENT: Vital Energi definitively understands the importance of strong environmental awareness and effective environmental management. As such, we are fully committed to constantly monitoring and improving energy performance in line with our vision, scope and ambition to remain a market leader in sustainable energy solutions.

Vital Energi also acknowledges the importance of continual improvement in order to ensure that internal environmental management remains relevant and proactive in contributing to the sustainability agenda and mitigating significant environmental impacts in the future. Examples of how we aim to achieve continuous improvement include...

- Reviewing, environmental policy and procedures with regularity; ensuring that energy management complies with relevant environmental laws and regulations.
- Regularly setting and reviewing energy targets and objectives.
- Maintaining ISO 50001 accreditation.

TRUSTED PARTNERSHIPS: We work closely with a network of local, regional and national partners and stakeholders to deliver our environment and sustainability ambitions.

It is important to us as a company to communicate our progressive environmental vision and energy management objectives to those we work with.

This policy statement, as well as relevant environmental procedures are communicated to key partners. In addition, our Environmental Aspects and Impacts register acknowledges the contributions of third parties to our activities and highlights steps taken to mitigate potential impacts.

Vital Energi believes it is important to maintain a collaborative approach in pursuing environmental objectives. As such, it is important that measures to ameliorate impacts associated with energy consumption continue to be communicated with key, partners, stakeholders and ensure this policy statement is made available to the public on request.
